SAI MADHAV

Computer Science Undergraduate | Data Science Specialization

LinkedIn: saimadhav1 | GitHub: saimadhav10

PROFILE

B.Tech Computer Science student specializing in Data Science, fascinated by data and numbers. Interested in exploratory data analysis, practical software development, and project planning, with projects spanning a real-time multiplayer web game and a Flutter mobile application.

EDUCATION

Mar Athanasius College of Engineering, Kothamangalam

B.Tech in Computer Science with specialization in Data Science
Expected graduation: 2029

SKILLS

Programming: Python, Java, C, HTML, CSS
Data: Exploratory data analysis (EDA), data analysis, pandas, scikit-learn
Application development: Flutter
Foundations: Network theory, basic hardware
Planning: Project planning

SELECTED PROJECTS

Pookalam.io | Real-time Multiplayer Web Game

An Onam-inspired drawing game with private multiplayer rooms, timed floral-pattern challenges, anonymous peer judging, and leaderboards. Uses an HTML5 Canvas drawing interface and Socket.io for real-time room and game-state updates.

Project stack: React, Vite, Tailwind CSS, Node.js, Express, Socket.io

github.com/saimadhav10/pookalam-io

COCTracker | Offline-first Android Companion

A Flutter companion for Clash of Clans that imports game JSON exports, manages multiple local village profiles, and tracks upgrades with persistent countdowns. Includes progress dashboards, upgrade recommendations, and backup and restore functionality.

Project stack: Flutter, Dart, local storage
